Buna idee .
ma voi referi la adobe ca sunt si softuri care fac asta automat e partea a doua.

ca sa nu te incurci treci la rama pe cm ca simti mai bine incrementul.

acum iti apare in cm cat e poza de mare.
eu dau exemplu de rama petrecuta peste poza.
aia din exemplu are 28,22 si 18,8
maresti zona cu 2 cm pe cele doua laturi.deci 30,22 si 20,8.
pana aici e clar da?
setezi de jos nuanta ramei ,ai varianta black acolo.

si dai ok.
sunt variante si mai sofisticate de rame,eu ti-am dat varianta cea mai simpla si mai uzuala.
ai grija ca atasarea de rama pe exterior poza ii mareste laturile.

Una din tehnici folosite de mine: de obicei ramele le atasez in PS (PhotoShop).

Uite cum trebuie sa faci: Selectezi imaginea... (incadrezi poza lasand la margini un spatiu), apoi in meniul Edit gasesti submeniul Stroke... Acolo ai posibilitatea sa alegi culoarea ramei, marimea si pozitionarea ei...Center, Inside, Outside.

Am sa atasez si un exemplu ...un printscreen....sper sa se inteleaga ceva din el...

- 1.select all
- 2.copy
- 3.new layer cu o dimesiune mai mare decat a pozei (diferenta de dimensiune e marimea ramei)
- 4.alegi culoare backgroundului
- 5.paste!
